Instructions

The piece is knit top down, starting at the collar. The round yoke is knit using a stranded colorwork technique, with evenly distributed increases throughout the work. The body and sleeves are knit in stockinette stitch, while the collar, ribbing and cuffs are made in 1x1 rib.

Collar and yoke: provisional cast-on 96 (96, 105, 111, 111, 114) stitches using 4.0 mm needles with a 60 cm cable and some yarn in a different color. Using color 20 (Natural), join the round, place the BOD marker (middle of back) and work 4 in / 10 cm in 1x1 rib.

Cinnamon Sweater

Yoke and collar: provisional cast-on 96 (96, 105, 111, 111, 114) stitches using 4.0 mm needles with a 60 cm cable and some yarn in a different color. Using color 20 (Natural), join the round, place the BOD marker (middle of back) and work 4 in / 10 cm in 1x1 rib.

SUSTAINABILITY

Environmental preservation has become part of our daily lives. It is believed that we need to move towards a more sustainable world. In order to do so, we are constantly investigating the market for new technologies and developing internal solutions to make products more sustainable.

OEKO-TEX

OEKO-TEX is an international certification that ensures, through a series of tests and analysis of samples, that 100% cotton products manufactured by Círculo do not have toxic substances that can cause harm to health. This certification is renewed annually, as well as the criteria that is reviewed with the same frequency.

BETTER COTTON

The Better Cotton Standard System is a holistic approach to sustainable cotton production which covers all three pillars of sustainability: environmental, social and economic. The system is designed to ensure the exchange of good practices, and to encourage the scaling up of collective action to establish Better Cotton as a sustainable mainstream commodity.

DYE CLEAN

The Dye Clean process was adapted in a pioneering way and today we are the only Brazilian yarn company that uses this process to dye some of the colors of our yarns. This process allows that the water used in the dyeing process can be used for several products with no need to be replaced for clean water. That option results in an economy of 90.92% of water on the yarns that the process was implemented on.

KNITTED KNOCKERS

Knitted Knockers are special handmade breast prostheses for women who have had breast cancer and undergone mastectomy or lumpectomy. Traditional breast prosthetics can be hot, heavy and sticky. They typically require special bras or camisoles with pockets and can't be worn for weeks after surgery. Knitted Knockers are soft, comfortable, beautiful and when placed in a regular bra they take the shape and feel of a real breast. They are adjustable, washable and can even be worn while swimming. Our special volunteer knitters provide these free to those requesting them.
